CAMBRIDGE BROADBAND RAISES NEW FUNDING OF \$9 MILLION

Cambridge, UK, 16 January 2006: Fixed wireless access equipment developer Cambridge Broadband Limited has closed its Series D financing round totalling \$9.0 million.

The new investment is being used to fund extensions to Cambridge Broadband's VectaStar wireless access and transmission product family, as well as covering medium term working capital requirements.

The investment follows Cambridge Broadband's continuing market success, with many publicly announced networks in a wide variety of geographies including Asia, Europe, Africa and the Middle East.

Peter Wharton, Chief Executive Officer of Cambridge Broadband, comments: "Our VectaStar platform is being increasingly used by cellular operators to backhaul their networks in place of traditional microwave links. This new funding helps us maintain our commitment to ongoing product development, as we continue to establish a leading role in the market."

Existing investors Accel Partners, Amadeus Capital Partners, Latin Rim and Techno Venture Management participated in this round of funding. Cambridge Broadband previously announced Series C funding of \$15.25 million in May 2004.

About Cambridge Broadband www.cambridgebroadband.com

Cambridge Broadband has pioneered the development of carrier-class, point-to-multipoint broadband wireless access equipment. The company is focused on delivering high quality multi-service networks to network operators with the best price-performance in the licensed bands worldwide. Cambridge Broadband was formed in January 2000 by an experienced team with a strong record of successful innovation in broadband wireless design.

About VectaStar

Cambridge Broadband's VectaStar is a highly flexible carrier-class broadband wireless platform for telecommunications and mobile operators. With its capacity, range, service mix, and spectral efficiency, VectaStar is a superior solution whether used for backhaul, access, or both. Technically and commercially proven in many deployments worldwide, VectaStar provides the perfect competitive advantage.
