

## **Sunday Times Tech Track 100 2009 recognises Cambridge Broadband Networks as the UK's fastest growing wireless hardware company**

*Mobile backhaul company named in UK's top 100 technology companies*

**Cambridge, UK, 21 September 2009:** [Cambridge Broadband Networks](#), the wireless industry's leading point-to-multipoint microwave backhaul specialist, announced today that it has made it onto the [Tech Track 100 league table](#) as the UK's fastest growing wireless hardware company. CBNL has been ranked 21<sup>st</sup> out of the fastest growing technology companies in the UK, according to the prestigious Tech Track league table.

The Tech Track 100 is an independent league table that ranks the top-performing privately held technology companies, based on sales growth over the last 3 years. Now in its ninth year, the Tech Track 100 list was announced in The Sunday Times, published on 20th September. Cambridge Broadband Networks' position was awarded due to sales growing fourfold between 2006 and 2009.

Graham Peel, CEO of Cambridge Broadband Networks commented, "To be recognised as the UK's fastest growing wireless hardware company is fantastic news for us and a reflection of the growing demand for mobile broadband services. Our highly efficient point-to-multipoint microwave backhaul solutions are now helping mobile operators around the world to meet that need. The past year may have been tough for many, but we're experiencing one of our best years yet."

The Tech Track league table is compiled by Fast Track ([www.fasttrack.co.uk](http://www.fasttrack.co.uk)) and is published in The Sunday Times each September. Other top 100 companies included Lovefilm.com and The Cloud

## **About Cambridge Broadband Networks**

Cambridge Broadband Networks ([www.cbnl.com](http://www.cbnl.com)), a member of the Next Generation Mobile Network (NGMN), provides telecommunications operators with carrier-class wireless point-to-multipoint transmission equipment. The company's unique approach to backhaul means that its technology provides operators with a highly compelling business case, reducing backhaul costs by up to 60%. To date, Cambridge Broadband Networks products have been commercially deployed and technically proven in more than 30 countries, and the company continues to expand into new geographical markets as wireless networks become more widespread throughout the world. Privately-held, Cambridge Broadband Networks has headquarters in Cambridge, UK, with offices in Malaysia and South Africa and manufacturing facilities in China.
